Beam Interactions with Materials & Atoms

Contents

Preface vii

Foreword ix

Committees and Sponsors x

I. Topics of FEL User Facilities and Applications

FEL beam qualities and application researches at the FELI
T. Tomimasu, T. Takii, Y. Kanazawa, A. Zako, A. Nagai and M. Yasumoto 1

Activities of the CLIO infrared facility
F. Glotin, J.M. Ortega, R. Prazeres and C. Rippon 8

Issues at a university based FEL center
T.I. Smith and H.A. Schwettman 18

Multi-user operation at an FEL facility
E.R. Crosson, G.E. James, H.A. Schwettman, T.I. Smith and R.L. Swent 25

FEL diagnostics and user control
G.M.H. Knippels and A.F.G. van der Meer 32

Industrial applications of the Jefferson Lab high-power free-electron laser
G.R. Neil and Jefferson Lab FEL Team 40

II. FEL Experiments in Progress

Electron linac for both storage ring injection and free electron laser oscillation
K. Emura, T. Shinzato and H. Takada 50

Micromachining with SR and FEL
H. Okuyama and H. Takada 58

Implementing storage rings free electron lasers for users on synchrotron radiation facilities: from Super-ACO to SOLEIL
M.E. Couprie, D. Nutarelli and M. Billardon 66

Single-bunch beam property for FEL on the UVSOR storage ring
H. Hama, M. Hosaka, J. Yamazaki and T. Kinoshita 75

SRFEL, FEL-X project, and applications at the ETL
T. Yamazaki, K. Yamada, N. Sei, H. Ohgaki, S. Sugiyama, R. Suzuki, T. Mikado, T. Noguchi, M. Chiwaki, T. Ohdaira and H. Toyokawa 83

Duke FEL storage ring light sources and applications
Y. Wu, V.N. Litvinenko, I.V. Pinayev, S.H. Park and B. Burnham 90

High performance FEL for the proposed PEARL research platform
R.J. Burke, C.E. Helsley, S.K. Sharma, C.K.N. Patel and J.M.J. Madey 99

III. Semiconductor Physics and Devices

Interfaces of semiconductor heterojunctions studied using an FEL
K. Nishi, N. Morota, Y. Murase and H. Nakashima 107
Resonant generation of terahertz optical sidebands from confined magnetoexcitons
J. Kono, M.Y. Su, J. Černe, M.S. Sherwin, S.J. Allen Jr., T. Inoshita, T. Noda and H. Sakaki 115
Ultrafast interband-light modulation by intersubband light (free-electron laser) in quantum wells
T. Asano, S. Noda, A. Sasaki, T. Suzuki, T. Mitsuyu, K. Nishi, H. Ohyama and T. Tomimasu 123
Terahertz, photon-assisted transport in semiconductor quantum structures
S.J. Allen 130
Semiconductors processing with FEL – FEL annealing
H. Ohyama, T. Mitsuyu and T. Tomimasu 135
Applications of the Beijing IR-free electron laser facility
Y. Li, J. Xie, J. Zhuang, X. Chang, M. Wang, Y. Zhong, G. Wu, Y. Wang, J. Xu, Z. Wang, Y. Fan, F. Li and J. Wang 140
Deposition of carbon thin films by free electron laser
M. Okoshi, M. Hanabusa and S. Okuma 147
Silicon nanostructure fabrication using IR-FELs and its optical properties
Y. Maeda, K. Umezawa and Y. Hayashi 152
Luminescence of GaAs/AlGaAs asymmetric double-quantum-wells excited by a mid-IR free electron laser
H. Nakano, J.M. Feng, H. Kubo, N. Mori and C. Hamaguchi 160
Photocurrent dynamics in single quantum well infrared photodetectors investigated by using free electron laser pulses
Y. Shimada and K. Hirakawa 166

IV. Photophysics and Photochemistry

Luminescence from ZnSe excited by picosecond mid-infrared FEL pulses
T. Mitsuyu, T. Suzuki and T. Tomimasu 172
Luminescence induced by IRFEL ablation of solid samples
M. Yasumoto, N. Umesaki, T. Tomimasu, T. Takii, Y. Kanazawa and A. Zako 176
Free electron laser (FEL) annealing of diamond
S. Ogino, H. Shiomi, N. Fujimori, K. Awazu and Y. Maeda 181
The FEL's role in next-generation process technology
M.J. Kelley 186

V. Photochemistry and Isotope Separation

Infrared multiple photon decomposition of $CHXF_2$ (X = Cl or Br) by infrared lasers
S. Arai, K. Ikawa, Y. Matsumoto, Y. Iizuka, K. Sugita, S.K. Sarkar and S. Kuribayashi 193
Multiphoton infrared isotope separation using the MkIII FEL system
A.K. Petrov, E.N. Chesnokov, S.R. Gorelik, Yu.N. Molin, K.D. Straub, E.B. Szarmes and J.M.J. Madey 203
IR spectroscopy on gas-phase molecules with a free electron laser
G. von Helden, I. Holleman, M. Putter and G. Meijer 211
Myoglobin's ultrafast dynamics measured with vibrational echo experiments
K.D. Rector and M.D. Fayer 218

VI. Medical Applications and Biotechnology

An innovative method to selectively ablate cholesterol esters from an arteriosclerotic region of the arterial wall using a free-electron laser
K. Awazu, A. Nagai, T. Tomimasu and K. Aizawa 225

Raman and FT-IR studies of photodynamic processes of cholesteryl oleate using IRFELs
Y. Fukami, Y. Maeda and K. Awazu 229
The surface modification of tooth dentine with a Free Electron Laser (FEL)
S. Ogino and K. Awazu 236
Fast IR imaging with sub-wavelength resolution using a transient near-field probe
D.V. Palanker, G.M.H. Knippels, T.I. Smith and H.A. Schwettman 240
Imaging single living cells with a scanning near-field infrared microscope based on a free electron laser
M.K. Hong, A.G. Jeung, N.V. Dokholyan, T.I. Smith, H.A. Schwettman, P. Huie and S. Erramilli 246
Hemostatic properties of the free-electron laser
G.P. Cram Jr. and M.L. Copeland 256
Infrared dynamics of collagen, microtubules, and water: Biophysical research enabling biomedical FEL applications
G. Edwards, D. Engh, J. Kozub and R. Williams 260
